**INXY** HOSTING  
MARKET

# Let your business be successful with inxy colocation services

Rent separate units or whole racks in leading datacenters with us.

INXY offers various reliable datacenters for colocation of your hardware. We offer flexible and large-scale facilities that provide highly interconnected and energy-efficient infrastructure for your hardware.

## Locations

- ✓ Datacenter.com, Amsterdam, Netherlands
- ✓ Tierpoint, Dallas, US
- ✓ SwitchDC, Amsterdam, Netheralnds
- ✓ Equinix, Ashburn, US

# What can INXY colocation offer your business?

## Security

We understand the importance of data security fully and take all advanced measures in this area to ensure your assets are intact, thus letting you to focus on business development. We maintain highest level of info and physical security by implementing high-end technological process and using the services of high-quality engineers, monitoring your equipment 24 hours a day, 7 days a week.

### Security is gained by

- ✓ Security fence around DC
- ✓ Alarm zones
- ✓ Full access control
- ✓ Non-interrupting CCTV surveillance of both interna and external areas
- ✓ Double walls
- ✓ 24/7 monitoring
- ✓ Cooling and power
- ✓ Different security measures and requirements for staff

## Power and cooling

are vital for ensuring smooth operation of hardware.

We offer the latest technologies, that allow to bring maximum reliability. Even if the outage of local power grids happens, your hardware will get power supply. In its turn, effective cooling system brings the optimal environment for mission-critical tasks.

## **We use the following practices for energy efficiency**

- ✓ **Air optimization** (air is used to provide needed temperature and humidity)
- ✓ **Hot/cold aisle containment** (cold and hot air are isolated from each other)
- ✓ **Water optimization** (the use of evaporative cooling capacity provided by the cooling tower demands less energy than refrigeration)

## **Connectivity**

We offer wide choice of connectivity and service providers, redundant meet-me rooms, access to internet exchanges and dual entry fiber entrance.

## **Compliance**

Compliance is known to be the top priority when it comes to serious business. We offer the best practices and approach to data security, sustainability and quality management. The audit of facilities are conducted several times a year.

## **Highlights of colocation**

- ✓ Total security, physical and virtual
- ✓ Tier 1 networking
- ✓ Meeting of requirements for every industry efficient cooling
- ✓ Fully controlled environment
- ✓ 24/7 monitoring and other services
- ✓ Fully certified and compliant
